

The Most Advanced Coating System

Ceramic Pro is a clear, liquid nano-ceramic coating. When cured, this technology chemically bonds to the paint surface, transforming itself to become a rigid superstructure of nanoglass, protecting the substrate it is applied to indefinitely.

Ceramic Pro was designed as an industrial, multi function, protective coating for all surfaces.

The nanoceramic glass coating forms an exceptionally strong and durable shield, resistant to solvents, acids, alkalis, UV rays, harsh weather conditions and corrosion.
